<b>ALCOHOL</b> <small>Alcohol is a drug. It is a depressant that slows down the functions of the brain and body. It is the most commonly abused drug in the United States. It is also the most commonly abused drug among teenagers.</small>		<b>DRUGS</b> <small>Drugs are substances that change the way the brain and body work. They can be used to treat medical conditions, but they can also be abused. Abuse of drugs can lead to addiction, which is a chronic disease. It is a disease that affects the brain and body, and it can be fatal.</small>
